DECOR Archival Glass & Art Spacers™ can be stacked to achieve the space you require.

Specifications: pH Neutral peel-'n-stick spacers. Available in clear and black (all sides uniformly finished to avoid mismatched sides). Solid construction for maximum rigidity and easy cutting ability using common shop tools such as cutting sheers, fillet trimmers and foot choppers. Easy and quick to install for metal or wood frames with glass or plexi. Aggressive double-sided tape adhesive for secure bonding.

Uses: DECOR Archival Glass & Art Spacers™ are ideal for a variety of professional picture framing applications.

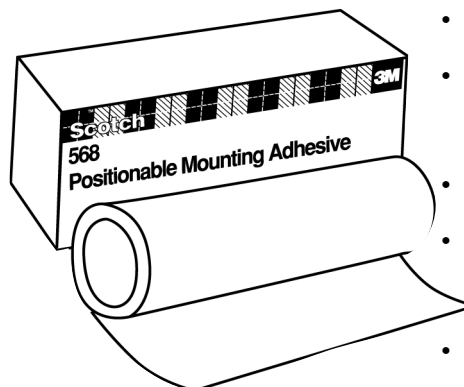

- All archival applications involving glazing should incorporate Archival Glass & Art Spacers™ to keep the artwork or print away

from the glass or acrylic to avoid image transfer and condensation damage.

- Photographs are particularly susceptible to humidity damage resulting from contact with glazing surfaces.
- Pencil, pastels, charcoals and even a child's crayon masterpiece should not contact a glazing surface as all dry mediums are very subject to image transfer.
- Textured mats, fillets, fabric wraps, needlework and float mounting would be flattened or distorted if not separated from the glass.

3M POSITIONABLE MOUNTING ADHESIVE

3M Positionable Mounting Adhesive (PMA) is the quick, clean alternative to spray adhesives for today's studio.

- Allows repositioning before bonding.
- Requires no heats, liquids, special equipment or clean-up.
- Ideal for desktop mounting in studio.
- Pressure activated adhesive for quick, clean and consistent bonding.
- Permanent bond will not stain or dry out
