

PROFESSIONAL CANVAS STRETCHING PLIERS

Item # 934

- Heavy duty pliers for all types of canvas for professionals who demand the best.
- 8" long with 3" non-slip jaw fits comfortably in your hand for easy use.

CHROME CANVAS STRETCHING PLIERS

Item # 935

- Heavy duty chrome plate steel.
- Spring return handle.
- 8" long with 2 1/4" serrated jaws provide perfect non-slip canvas grip.

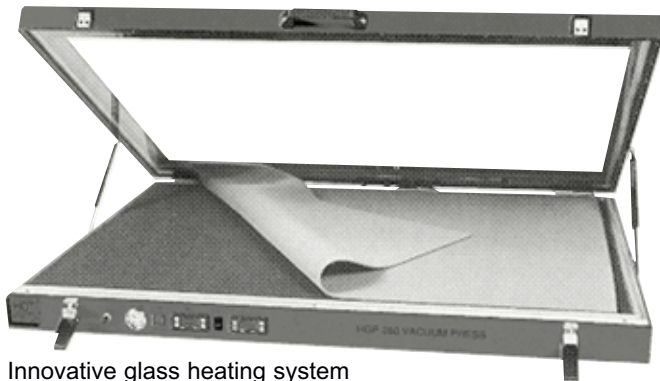

8" PROFESSIONAL GLASS PLIERS

Item # 936

- Heavy duty professional glass pliers made of forged steel with 1" flat jaws.
- Flat jaws smoothly clamp onto scored glass for safe snapping

DRYFAC HOT/COLD GLASS TOP VACUUM PRESSES

- Innovative glass heating system
- Sturdy construction
- Auto cycle cut-off
- Manual override for maximum flexibility
- Hot or cold usage
- Pressure control valve
- Digitally controlled heat and time settings.

Suitable for all mounting, heatsealing and canvas bonding processes. This range of glass top vacuum presses has been designed with standard display formats in mind. Each model is capable of handling the widest variety of materials from foam board and wood to photos, art prints and delicate fabrics. Incorporating the highly effective glass heating system, these presses produce a very even spread of heat across the work surface, leading to a superior quality of surface finish. All models include a built-in, digitally controlled timer. This timer can be set for any chosen period and will cut off the pressure at the end of the programmed cycle. A manual override switch allows the program to be interrupted at any time. This gives the operator maximum flexibility, ease of use and optimum quality results. The degree of pressure applied can also be controlled to assist when processing foam centered board or delicate subjects such as fabrics.

TACKING IRONS

21st Century Tacking Iron

Includes wire metal stand and 100% cotton sock.

Precise, electronic temperature control makes the 21st Century Tacking Iron the one to consider when critical temperature maintenance is necessary. The built-in solid-state temperature control keeps the shoe temperature within 3°F of the dial. The dial is located on the cool handle, not the hot iron itself, so you won't burn your fingers. This unit heats up quickly and accurately. Temperatures range from 150°F to over 420°F. With curved sides

and a rounded point, the 21st Century allows you to easily reach tight spots without ripping or gouging any part of the artwork. Its coated surface resists scratches and adhesive buildup.

Item #694

Black Baron Tacking Iron

Complete with wire stand and 5 1/2' AC power cord

Designed for easy, professional-quality heating and tacking needs. Dial thermostat allows temps from 150°F to 410°F to be achieved. Glide easily over fabric or film surface due to the 100% coated shoe. The professionally designed shoe with its rounded sides and toe allows

for clean and efficient tacking.

Item #693

HOT/COLD COMBO VACUUM PRESSES

Touch-pad controls assure consistency and are user-friendly with easy-to-read digital displays. Programmable systems controller allows you to select from 6 factory-installed programs for temperature and dwell time, or easily pre-set your own combinations. Includes end of cycle signal. Supplied with a maintenance-free vacuum pump and twistlock plug. CUL listed. 230 VAC, single phase 4-wire, 11, 15 or 26 amps.

MECHANICAL DRY MOUNT PRESS

Table-top, heat-activated dry mounting systems built to stand up to heavy use for years. They utilize uniform heat and pressure to mount, laminate, and texturize prints on substrates up to 1" thick (model #979). Features electronic temperature control (100°-300°) with easy-to-read digital display and touch pad controls. Capable of finishing pieces even larger than the press itself. Six pre-set programs. UL listed. 120V, 12 amp.
