

## AlphaMat Artcare

Artcare products feature the patented MicroChamber® technology that provides a preventative conservation protection unavailable with other matboard. A unique combination of zeolites and buffers traps and neutralizes oxidizing gasses, other pre-acidic gasses, and degradative by-products - giving Artcare boards the ability to actively protect art and photographs

against attack by external pollutants and internal vices.

Alphamat is made to exacting 100% archival standards using virgin alpha-cellulose fiber. Produced with pigments, not dyes and is fade and bleed resistant to insure lasting colors for the life of your customers' art. All cores are solid white archival and lignin-free for clean consistent cut bevels.
