

ART CONSERVATION PRODUCTS

LINECO METHYL CELLULOSE ADHESIVE

A neutral pH adhesive that is great for long term stability. Excellent for use in repairs, bookbinding, art construction, hinging and general archival adhesive applications. Dries clear. Reversible with cold water.

- Neutral pH
- Clear-drying
- Non-toxic
- Vermin-proof

L6151502 <input checked="" type="checkbox"/>	2 oz		

LINECO KLUCEL G CELLULOSE ADHESIVE

Can be dissolved in either water or alcohol. In alcohol its solubility presents the most useful possibility. It introduces the prospect of adhesion without the deformation that water can cause. Also a leather consolidant that assists in the prevention of the spread of damage caused by red rot.

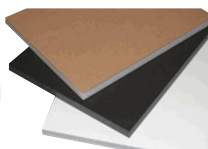

- Won't be metabolized by molds or pests
- No refrigeration necessary
- Extensive hand drying with desiccated blotters is no longer critical
- Allows the creation of hinges nearly as wide as the artwork itself

LINECO PAPER & BOARD pH TESTING PEN

Easily determine whether the paper and board you are using is acidic. Easy-to-use, simply draw a small line on the material you wish to test. The chlorophenol red indicator solution in the pen will turn purple on any paper with a pH of 6.8 and above. A clear or yellow color indicates the material is probably unsuitable for conservation purposes. Please note: unreliable results may occur on colored or coated papers

DEACIDIFICATION SPRAY

Bookkeeper Spray Products safely treats manuscripts, documents, clippings, maps, posters, and other paper-based materials contained in modern library and archival collections.

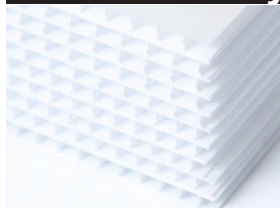

The suspension dries odor free in minutes and does not damage inks, adhesives, or binding materials. It is non-clogging, non-toxic, non-hazardous, non-flammable, does not contain CFC's and is completely safe for the environment.

It deposits a safe, non-toxic alkaline buffer into the structure of the paper. This buffer material neutralizes acids that can rapidly weaken the paper and cause it to become brittle. Does not expire.
