

FRAMESPACE®

A permanent art-glass separator that grips over the edge of the glass in picture frames to space the art away from the glass.

FrameSpace® is made from a neutral pH plastic. It helps prevent mold growth, paper buckling, image transfer and adhesion to the glass. Removes easily to clean or replace the glass. The deeper shapes can be used to make any appropriate wood or metal frame into a shadowbox for framing objects.

- Quick-and-easy. Saves time
- Works in any frame.
- Professional looking - No painting.
- Works in both wood & metal frames.
- Neutral pH - No plasticizers - Won't harm art.
- Permanent - No glues or adhesives required.
- Protects glass from chipping in metal frames.

ECONOSPACE®

"Peel-and-Stick"

EconoSpace® is a neutral pH plastic "peel & stick" type art-glass separator that bonds to the edge of the glass. This makes the proper airspace between the art and glass in either wood or metal frames. Helps prevent mold growth, paper buckling, image transfer and adhesion to the glass. Quick & easy. Cuts easily & clean with razor or shears. Professional looking - No painting. Neutral pH - No plasticizers - Won't harm fine art.
